SUMMARY

Recent Computer Science (AI & ML) graduate with a strong foundation in Machine Learning, Deep Learning, and Data Structures. Gained hands-on exposure to Python, Java, SQL, Scikit-learn, React.js, Node.js, and MongoDB through academic projects and internships.

EDUCATION

BVRIT Hyderabad College of Engineering for Women

2022 – 2026

B.Tech, Computer Science and Engineering (AI & ML)

CGPA: 8.50/10.0

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Machine Learning, Deep Learning, CNNs, Data Preprocessing, Feature Engineering, Predictive Analytics

Libraries: NumPy, Pandas, Scikit-learn, Matplotlib

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, Linux

Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

AI Developer Intern — Swecha – Summer of AI (IIIT Hyderabad)

May 2025 – Jun 2025

- Collected, preprocessed, and analyzed large datasets using Python, Pandas, and NumPy.
- Developed, trained, and evaluated machine learning models using Scikit-learn for predictive analytics.
- Applied feature engineering, data preprocessing, and image augmentation techniques to improve model performance and reduce false-negative predictions.
- Conducted model evaluation and performance analysis using real-world datasets and documented development workflows, results, and performance metrics.

PROJECTS

False-Negative Aware Deep Learning for Reliable Pneumonia Detection

GitHub

- Developed and trained a CNN-based deep learning model for pneumonia detection using chest X-ray images.
- Performed data preprocessing, image augmentation, model training, and evaluation to improve prediction reliability and reduce false-negative cases..
- **Tech Stack:** Python, CNN, NumPy, Scikit-learn

AI Data Scientist Agent

GitHub

- Built an automated ML pipeline for data preprocessing, visualization, model training, and model comparison.
- Applied Regression and Classification algorithms and evaluated performance using accuracy, precision, recall, and F1-score.
- **Tech Stack:** Python, Pandas, Scikit-learn, Matplotlib

Pampered Paws

GitHub

- Developed a full-stack pet adoption platform with user authentication, adoption requests, and RESTful APIs. Implemented efficient data management using MongoDB and the MERN stack.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js

CERTIFICATIONS

- Generative AI Virtual Internship – EduSkills (2024)
- Business and Data Analytics Internship – YBI Foundation (2025)
- Certificate of Participation – Viswam.AI (2025)
